

Workday @ UMMC: Student

Recruiting

More effectively engage with prospective students by delivering messages and materials to guide prospects through the application process. Enhanced mobile communication allowing the recruiters flexibility to communicate when traveling.

Admissions

This Workday application will help streamline the admissions process for applicants, committee members and administrators.

Curriculum Management

Allow UMMC to create, manage, and maintain courses using one curriculum management system.

Academic Advising

Help with defining students' academic requirements and assess their progress through degree audits. It provides an enhanced engagement piece allowing for robust communication with the student.

Records and Registration

Records will allow us to manage enrollment-related activities, including various registration methods, grading, transcripts, and graduation.

Financial Aid

This will allow UMMC to administer federal, state and private source programs and students to manage their aid.

Student Financials

With a single system we will improve visibility, control and consistency. All aspects of the student financial account will be visible in this system.
