

How to Disable the Compatibility View/Mode in IE 11

1. Click the gear icon in IE 11. It is located at the far right end of the browser header.
2. Select Compatibility View/Mode.

3. Ensure that the checkbox beside “Display all Intranet sites in Compatibility View” is not selected. The box should be empty.

4. Check the list of sites that have been added to Compatibility View. If umc.edu is listed, it must be removed to ensure full functionality in TracDat.
5. Click Close.
