

Increasing **diversity**
in obesity research.

OBESITY HEALTH DISPARITIES RESEARCH

OHD PRIDE helps create biomedical research leaders.

OHD PRIDE Overview

The Obesity Health Disparities Research PRIDE (OHD PRIDE) program is designed to enhance the participation of individuals from underrepresented backgrounds in an evidence-based research training and mentoring program. The program includes outreach to early-career faculty or transitioning postdoctoral fellows who hold appointments at, or earned degrees from Historically Black Colleges and Universities (HBCUs).

OHD PRIDE is a partnership between University of Mississippi Medical Center, University of California at Los Angeles, and Vanderbilt University.

OHD PRIDE Fellows will receive:

Training in the interdisciplinary research skills needed to develop successful careers in obesity health disparities research.

Mentoring from faculty who have extensive experience in obesity research and obesity health disparities research.

Support for research project development through critical review of early proposal drafts, mock study sections, and acquisition of pilot data through the PRIDE small grants program.

Networking opportunities to build professional relationships with a diverse group of researchers, scholars, NIH program officials, and community-based partners at scientific meetings, including an annual conference hosted by the National Heart, Lung, and Blood Institute (NHLBI) and the PRIDE program in Bethesda, Maryland.

Ongoing support through the OHD PRIDE Alumni Network that provides additional research support, online training sessions, and continuous monitoring of career objectives.

About PRIDE

The Programs to Increase Diversity Among Individuals Engaged in Health-Related Research, collectively referred to as PRIDE, were established to mentor early-career faculty and transitioning postdoctoral fellows whose backgrounds are currently underrepresented in biomedical research. PRIDE gives these scientists opportunities to gain the knowledge and tools they need to carry out independent and meaningful research and advance their careers. This initiative is funded by NHLBI.

Training

OHD PRIDE is a two-year program consisting of four phases.

Phase I – Summer Institute I

Ten-day, face-to-face courses in obesity research, data collection, data analysis, intervention development, and research methods held in Jackson, Mississippi

Phase II – Mid-year Meeting

A two-day, in-person meeting to provide mentees with an opportunity to discuss research progress with mentors and receive feedback on their manuscripts and grant applications

Phase III – Summer Institute II

A five-day training course for mentees to participate in mock study sections, receive critical reviews of their manuscripts and finalize plans for grant submissions

Phase IV – The OHD PRIDE Alumni Network

Quarterly seminars on career advancement for participants who complete the PRIDE program, as well as peer-mentoring, and social support

Eligibility Criteria

Eight research-oriented individuals from underrepresented backgrounds who are early-career faculty or transitioning postdoctoral fellows will be accepted in the OHD PRIDE program annually, through a competitive review process. OHD PRIDE has a special commitment to recruit applicants with faculty appointments at, or degrees from HBCUs.

Eligibility Requirements:

- A transitioning postdoctoral fellow OR an early-career faculty member with a discernible interest in obesity research
- An individual from a group identified by the National Science Foundation as underrepresented in the biomedical, clinical, behavioral, and social sciences (See NIH Notice NOT OD-18-210)
- A citizen of the United States OR a permanent U.S. resident

Application Process

The application process for the OHD PRIDE program will be managed through the Coordination Core of the NHLBI-sponsored PRIDE programs.

Applicants should complete and submit a PRIDE pre-application form (and a full application, if invited) through the PRIDE Coordination Core website.

To submit a pre-application form, visit umc.edu/ohdpride or pridecc.wustl.edu

The target for application submission is March 22, 2019, with a rolling deadline until all positions are filled.

OHD PRIDE

Program Faculty, Mentors, and Coaches

Ronny A. Bell, PhD

Professor and Chair of Public Health
Brody School of Medicine
East Carolina University

Gary G. Bennett, PhD

Professor of Psychology, Neuroscience, Global Health, and Medicine
Duke University

Adolfo Correa, MD, MPH, PhD, MBA

Professor of Medicine, Pediatrics, and Population Health Science
Director and PI, Jackson Heart Study
University of Mississippi Medical Center

Melicia C. Whitt-Glover, PhD, FACSM

President and CEO, Gramercy Research Group
Executive Director, Center of Excellence for the Elimination of Health Disparities
Winston-Salem State University

Derek M. Griffith, PhD (Coach)

Professor of Medicine, Health, and Society
Founding Director, Center for Research on Men's Health
Vanderbilt University

Elizabeth Heitman, PhD (Mentor)

Professor, Program in Ethics in Science and Medicine
University of Texas Southwestern Medical Center

Stephanie T. Miller-Hughes, PhD, MS, MSCI (Coach)

Associate Professor of Surgery
Meharry Medical College

Shiriki K. Kumanyika, PhD, MPH

Founder and Chair, Council on Black Health
Research Professor, Community Health and Prevention
Dornsife School of Public Health
Drexel University

Dulcie Kermah, EdD, MPH

Assistant Professor of Medicine
Charles Drew University of Medicine and Science

Daniel W. Jones, MD

Professor of Medicine and Physiology
Director of Clinical and Population Science,
Mississippi Center for Obesity Research
University of Mississippi Medical Center

Dara D. Mendez, PhD, MPH

Assistant Professor of Behavioral and Community Health Sciences and Epidemiology
University of Pittsburgh Graduate School of Public Health

Nia S. Mitchell, MD, MPH

Assistant Professor of Medicine
Duke University

Isabel C. Scarinci, PhD, MPH

Professor of Preventive Medicine
University of Alabama School of Medicine

Roland J. Thorpe Jr., PhD (Mentor)

Associate Professor of Health, Behavior, and Society
Director, Program for Research on Men's Health
Johns Hopkins Bloomberg School of Public Health

Angela Odoms-Young, PhD

Associate Professor of Kinesiology and Nutrition
College of Applied Health Sciences
University of Illinois at Chicago

OHD PRIDE is funded by a grant from the National Heart, Lung, and Blood Institute to the University of Mississippi Medical Center. Grant #2R25HL126145
