

## Why TeleECHO (Extension for Community Healthcare Outcomes)?

Project ECHO is a lifelong learning and guided practice model that revolutionizes medical education and exponentially increases workforce capacity to provide best-practice specialty care and reduce health disparities.

The HPV Vaccination ECHO is a technology-enabled, collaborative learning program that enables Mississippi healthcare providers to make a lasting impact on HPV vaccination and help reduce the HPV-related cancer burden in Mississippi.

## Learn about best practices and evidence-based strategies for recommending, delivering, or prioritizing the HPV vaccine through didactic and case presentations:

- Identify actions that you and your system can take to increase HPV vaccination rates
- Understand how to identify missed opportunities for vaccination
- Understand how to identify evidence-based interventions for vaccination
- Understand how to use population health data to monitor vaccination rates
- Understand how to develop appropriate goals for vaccination

## The HPV Vaccination ECHO offers:

- Free continuing education credits for healthcare providers
- Collaboration, support and ongoing learning with subject-matter experts
- New ways to support patients in decision making

## Are you ready to join the HPV Vaccination ECHO?
