2016 MCR DATA CERTIFICATION

Congratulations to the following facilities for achieving MCR Gold and Silver Certification on data diagnosed in 2016.

GOLD CERTIFICATION was based on hospitals having 95% completeness, 100% death clearance forms returned by second request deadline, <=2% missing data fields (age, sex & county at diagnoses) & <= 3% race.

GOLD

Anderson Regional Health System
Baptist Medical Center Attala
Baptist Medical Center Yazoo
BMH-Booneville
BMH-Calhoun
BMH-Desoto
BMH-Golden Triangle
BMH-North
BMH-Union County
Copiah County Medical Center
Covington County Hospital
Delta Regional Medical Center
Field Health System

Forrest General Hospital
Garden Park Medical Center
George Regional Health System
Greenwood Leflore Hospital

Prostate Staging

Clinical T -

Physical Exam and Digital Rectal Exam (DRE)

- * "Gold standard" for staging
- * REQUIRED for assigning the T category
- * Determines whether tumor is apparent or inapparent

Blank vs X

cTX: no DRE, physician did not examine the patient

cT__ (blank): registrar had no access to the information

cT__ (blank): no workup for patient, incidental finding at surgical treatment

*Note: If the patient has an elevated PSA but there is no information regarding the DRE, do not assign cT1C.

Breast Staging

Pathologic T -

Size for T category

- * Nearest mm is used
 - * Do Not add the core biopsy to the residual tumor in resection
 - * May need to use either core biopsy or resection to assign T
- Note: If the core biopsy size is larger than the residual tumor on resection - use the core biopsy size.

Summary Stage 2018

<https://seer.cancer.gov/tools/ssm/SSM2018-General-Instructions.pdf>

Code	Definition
0	In Situ
1	Localized Only
2	Regional By Direct Extension Only
3	Regional Lymph Nodes Only
4	Regional By BOTH Direct Extension AND Lymph Node Involvement
7	Distant Site(s)/Node(s)
8	Benign/Borderline (Brain, CNS Other, Intracranial Gland)
9	Unknown if extension or metastasis (unstaged, unknown, or unspecified) Death Certificate Only Case

2018 Implementations and Updates

AJCC Cancer Staging Manual

Cases with a diagnosis date of 01/01/2018 and forward should be staged using AJCC 8th Edition Cancer Staging Manual. The 3rd printing 2018 Edition is now available. The eBook is coming in 2018.

- Please visit <https://cancerstaging.org/references-tools/deskreferences/Pages/8EUpdates.aspx#> for all 8th Edition updates and corrections. For all other information, visit <https://cancerstaging.org/Pages/default.aspx>.

Summary Stage 2018

The 2018 version of Summary Stage applies to every site and/or histology combination, including lymphomas and leukemias. Summary Stage uses all information available in the medical record; in other words, it is a combination of the most precise clinical and pathological documentation of the extent of disease. The Summary Stage 2018 manual is available at <https://seer.cancer.gov/tools/ssm/>.

Site Specific Data Items (SSDI)

Site Specific Data Items (SSDI) are similar to the Site Specific Factors (SSF) collected with Collaborative Stage. These data items are specific to certain site/histology combinations. For example, the SSDI's for breast will be used to collect information such as estrogen receptor status, progesterone receptor status, Her2 status, Nottingham grade, and additional information related to primary tumors of the breast. The information collected in these data items are specific to breast. The SSDI manual is available at <https://apps.naaccr.org/ssdi/list/>.

Grade

Beginning with cases diagnosed in 2018 grade information will be collected in three fields; Clinical Grade, Pathological Grade, and Post-Therapy Grade. Within the Grade Manual you will find definitions for the three new grade data items, coding instructions, and the site/histology specific grade tables. The Grade manual is available at <https://www.naaccr.org/SSDI/Grade-Manual.pdf?v=1527859766>.

SEER Hematopoietic and Lymphoid Neoplasm Database

This provides data collection rules for hematopoietic and lymphoid neoplasms for 2010+. The SEER Hematopoietic and Lymphoid Neoplasm manual is available at [https://seer.cancer.gov/tools/heme/Hematopoietic Instructions and Rules.pdf](https://seer.cancer.gov/tools/heme/Hematopoietic%20Instructions%20and%20Rules.pdf).

2018 Solid Tumor Coding Manual

Use the 2018 Solid Tumor coding rules to determine the number of primaries to abstract and the histology to code for cases diagnosed 2018 and forward. The Solid Tumor coding rules replace the [2007 Multiple Primary and Histology \(MP/H\) Rules](#). The is available at <https://seer.cancer.gov/tools/solidtumor/>. The [change log](#) contains updates made to the FINAL module sections. This does not include changes made to the drafts.

CoC 2018 STORE Manual

The STORE Manual has replaced the FORDS Manual. The STORE is now available at <https://www.facs.org/quality-programs/cancer/ncdb/registrymanuals/cocmanuals>.

CTR EXAM

October 15 – November 3;
application deadline = September 25
