Course Description:

In this course, closed dental malpractice claims will be analyzed to identify how and when dentists and their staff can implement risk management and ethical principles to enhance patient safety and reduce untoward outcomes. Topics include extractions and implants, failure to diagnose, nerve injury, and patient selection and management considerations. There are no prerequisites.

Objectives

- Apply clinical risk management strategies to improve patient safety, mitigate associated risk factors, and reduce untoward outcomes and malpractice claims
- Implement strategies to help prevent failure to diagnose allegations
- Recognize the potential effect technology and applied risk management can have on mitigating and managing nerve injury

Speaker:

Richard Small, JD
