Dr. Foroud Hakim

Dr. Hakim has balanced private practice and dental education for over 21 years in the San Francisco Bay Area. He has a true passion for restorative dentistry ranging from complex rehabilitation to optimal and conservative single tooth restoration. He is Vice Chair of the Department of Restorative Dentistry at University of the Pacific and is course director for "Occlusion, TMJ & Advanced Restorative Concepts". He is also a director in the "Esthetic and Complex Care Clinic" at Pacific.

Dr. Chad Duplantis

Dr. Duplantis received his D.D.S. degree from The University of Texas Health Science Center at San Antonio, Dental School in 1999.

He continued with postdoctoral training at Baylor College of Dentistry, earning a certificate in Advanced Education in General Dentistry in 2000. He has also applied for, and been confirmed for his Fellowship degree from the Academy of General Dentistry this coming July. He has been in private practice since 2000 in the North Fort Worth, Texas area. In private practice, he treats all ages with an emphasis on restorative and aesthetic dentistry.

YOUR PREP IS DONE, NOW WHAT?

DR. FOROUD HAKIM

With so much instruction dedicated to modern crown & bridge principals, the latest in ceramics, treatment planning and cementation vs. bonding, there are some critical components to this workflow that are often ignored in CE.

This CE webinar will do a deep dive into two very important clinical steps critical to successful crown & bridge delivery, impression making and provisionalization. Learn about the latest advances in PVS materials and how to develop a bulletproof protocol for predictable impression capture. The latest in provisional materials and delivery techniques will also be covered with many clinical pearls aimed to make daily practice more predictable and enjoyable.

MAKING A GREAT FIRST IMPRESSION EVERY SINGLE TIME

DR. CHAD DUPLANTIS

When a clinician struggles with the laboratory or the fit of a final restoration, the answer can often be found at the prep appointment. The integrity of our final restoration is often related to the quality of the impression that we make at the preparation appointment.

This CE webinar will provide you with some clinical tips that will help you insure that you have quality that is consistent and predictable. Learning the value of properly designed preparations, retraction techniques that aid in predictable impression techniques and much more.

ADA CERP® | Continuing Education Recognition Program

Viva Learning is an approved ADA CERP Provider, AGD PACE Provider, and California State Dental Board Provider of dental continuing education. (More information regarding accreditation can be found on the Viva Learning website)
